Students should use screen capture software to take a screen shot of the bottom part of their finished tests, then save the screen shot to a place chosen by the teacher.

The teacher may paste the screen shots into a document, either full size or reduced to make them all fit on the minimum number of pages. The teacher then saves the page as a document or as a PDF.

The teacher now has a record of each student's answers and the total score.

Unfortunately, the scores can only be loaded into another software package manually as the screen shots are jpeg images.
